EDUCATION

2023:
PG Certification Program in Artificial Intelligence & Machine Learning by IIIT, Hyderabad

2003:
M.Sci (Computer Science), from Maharishi Dayanand University, Rohtak with First Division

2002:
PGDCA from Maharishi Dayanand University, Rohtak with First Division

CERTIFICATION

- Agentic AI and AI Agents – Vanderbilt University
- Backend Development with Node.js and Express – IBM
- Certificate of National Workshop of Software Security (NWSS-2007) From Jamia Millia Islamia, Delhi

INNOVATION PROJECTS

- **AI Chatbot with RAG Architecture**
  Built conversational AI assistant using **LLM + Retrieval Augmented Generation (RAG)**.

- **Task Management System**
  This Proof of Concept (POC) focuses on integrating Golang (Fiber), React + TypeScript, and MongoDB Atlas into a production-ready workflow. The app is a task management system where users can create, update, and organize tasks seamlessly.

PROFILE SUMMARY

Senior Frontend Architect with **14+ years of experience building modern frontend platforms using React, Next.js, and TypeScript**, and **19 years of overall experience in software engineering and enterprise digital platforms**.
Expert in designing scalable **micro-frontend ecosystems, design systems, and headless CMS architectures** for global enterprises across healthcare, finance, and digital commerce.
Proven track record of modernizing legacy systems into **API-first, cloud-ready platforms**, leading distributed engineering teams, and delivering high-performance applications used by millions of users.

Key strengths:

- Architecting large-scale **React/Next.js platforms** for enterprise applications
- Designing **Micro-Frontend architectures using Module Federation**
- Building **Design Systems & reusable component libraries (Atomic Design)**
- Modernizing monolithic UI platforms to **Headless CMS & API-first ecosystems**
- Driving **performance optimization, accessibility (WCAG), and frontend governance**

TECHNICAL SKILLS

- **Frontend Architecture**
  React, Next.js, TypeScript, ES6+, Micro-Frontends, Module Federation, Design Systems, Atomic Design, SSR, SSG, ISR, Web Performance Optimization, Component Architecture
- **Backend & APIs**
  Node.js, Express.js, Golang, REST APIs, GraphQL
- **Cloud & DevOps**
  AWS (architecture exposure), CI/CD pipelines, CDN architecture, deployment automation
- **AI & Emerging Technologies**
  LLMs, RAG Architectures, LangChain, LangGraph, AI Agents, Conversational Interfaces
- **Platforms & Tools**
  AEM Headless CMS, Webpack, Git, Agile / Scrum, Component-Driven Development

PROFESSIONAL EXPERIENCE

Sep'20 – Jan'26: Sr. Technical Architect | Credera (TA Digital), Gurgaon

Led frontend architecture and modernization initiatives for large enterprise digital platforms, focusing on **scalability, performance, and headless architecture adoption**.

Key Contributions

- Architected scalable **React / Next.js platforms** for global enterprise clients.
- Led migration of legacy monolithic systems to **Next.js micro-frontend architecture**, improving maintainability and developer productivity.
- Designed enterprise **design systems using Atomic Design principles**, enabling reusable UI components across multiple teams.
- Defined **frontend engineering governance**, including performance standards, accessibility compliance (WCAG), and code quality practices.
- Implemented **headless CMS architecture using AEM**, enabling flexible content delivery through APIs.
- Collaborated with product, UX, backend, and DevOps teams to deliver scalable digital platforms.
- Contributed to **technical pre-sales, solution architecture proposals, and engineering capability development**.

Representative Projects

Humana – Multi-Site Headless Platform

- Architected scalable digital platform using **Next.js, TypeScript, and AEM**.
- Built reusable component architecture enabling rapid **multi-site deployments**.
- Delivered high-performance user experiences through optimized frontend architecture.

Clients included: **Humana, United Healthcare (UHC), Pro-Unlimited**.

AWARDS & ACHIEVEMENTS

Credera

- Certificate of Appreciation in 2025
- Honored with multiple Spot Awards for outstanding contributions in 2023, 2022, 2021
- Recognized with a WOW Card in 2022 for exceptional performance.

Publicis Sapient

- Awarded the Super-Star Award for exemplary performance.

NIIT Ltd.

- Received Best Team Appreciation Letter for contributions to Red Hat project (Q2–2012).
- Honored with the HP Gold Award for implementing learning techniques.

Earned multiple WOW Cards for:

- Successfully managing the first ZD interact session and coordinating cross-functional teams to ensure the success of the Gajini Scrum.
- Proactively taking ownership & supporting the Construction Team for Alias-related activities.
- Collaborated closely with QC and CT teams to close Alisa activities, which was highly appreciated by stakeholders.
- Recognized during the LSE Bash for effective SCRUM implementation.

Intersoft

- Awarded the Star Performer of Q4 2008 for operational excellence.
- Received Best Team Appreciation Letter for outstanding work on Discover America project.

Aug'14 – Sep'20: Senior Software Engineer (L2) | Publicis Sapient, Gurgaon

Developed enterprise single-page applications and collaborated with global clients to deliver scalable frontend platforms.

Key Contributions

- Built large-scale applications using **React, Redux, ES6, Styled Components, and SCSS**.
- Led design reviews and technical validation sessions with stakeholders and engineering teams.
- Implemented scalable frontend architectures aligned with business and product goals.
- Enforced code quality standards, accessibility compliance, and performance optimization.

Projects

Sentosa Digital Platform

- Developed responsive web platform using **React and Redux**.
- Implemented reusable UI components improving development efficiency.

IMC Platform

- Built scalable React application using **component-based architecture**.

Aug'13 – Aug'14: System Analyst | Instant System Inc., Noida

- Designed automated **cross-browser testing frameworks** for functional and UI regression testing.
- Reduced manual testing effort by implementing reusable automation workflows.

Aug'10 – Sep'13: Senior Software Engineer | NIIT Ltd., Gurgaon

- Developed interactive eLearning platforms using **HTML5, JavaScript, and multimedia technologies**.
- Designed gamified learning modules to enhance user engagement and learning outcomes.

EARLIER CAREER (2006 - 2010)

Jan'08 – Jan'10: Senior Software Engineer | INTERSOFT Data Lab.S Pvt. Ltd., Gurgaon
Technology: Flash(Action Script-3), Flex

Apr'07 – Jan'08: Software Engineer | Saffronrage Solutions Pvt. Ltd. (Formerly Known Netcradle), Gurgaon
Technology: Flash(Action Script-3)

Jul'06 – Mar'07: Flash Developer | Classic Informatics Pvt. Ltd., Delhi
Technology: Flash(Action Script-3)

LEADERSHIP & IMPACT

- Led distributed engineering teams delivering enterprise-scale frontend platforms
- Defined **frontend architecture standards and governance frameworks**
- Mentored engineers and contributed to capability development
- Collaborated with stakeholders to align technical roadmaps with business goals
